...

2 AN Logic

...

3 AR Logic

...

4 AL Logic

...

### 5 ANA Logic

#### 5.1 Examples

$$\frac{\overline{X \vdash_{\mathcal{A}} X} \quad \overline{Y \vdash_{\mathcal{A}} Y} \quad \overline{VAR}}{X, Y \vdash_{\mathcal{A}} X \trianglerighteq Y} \quad \overline{TR} \\
\underline{X, Y \vdash_{\mathcal{L}} \mathsf{G}(X \trianglerighteq Y)} \quad \mathsf{GR} \\
\underline{GX, Y \vdash_{\mathcal{L}} \mathsf{G}(X \trianglerighteq Y)} \quad \mathsf{GL} \\
\underline{GX, GY \vdash_{\mathcal{L}} \mathsf{G}(X \trianglerighteq Y)} \quad \mathsf{GL} \\
\underline{GX \triangleright \mathsf{G} Y \vdash_{\mathcal{L}} \mathsf{G}(X \trianglerighteq Y)} \quad \mathsf{TL}$$

$$\frac{\frac{\overline{X \vdash_{\mathcal{A}} X} \quad \text{VAR}}{X \vdash_{\mathcal{L}} \mathsf{G} X} \quad \mathsf{GR}}{X \vdash_{\mathcal{L}} \mathsf{G} X} \quad \frac{\overline{Y \vdash_{\mathcal{A}} Y} \quad \mathsf{VAR}}{Y \vdash_{\mathcal{L}} \mathsf{G} Y} \quad \mathsf{GR}}{X \vdash_{\mathcal{L}} \mathsf{G} X \rhd \mathsf{G} Y} \quad \mathsf{TR}}{X \trianglerighteq_{\mathcal{L}} Y \vdash_{\mathcal{L}} \mathsf{G} X \rhd \mathsf{G} Y} \quad \mathsf{TL}}{\mathsf{G} (X \trianglerighteq_{\mathcal{L}} Y) \vdash_{\mathcal{L}} \mathsf{G} X \rhd \mathsf{G} Y} \quad \mathsf{GL}}$$

Using the above two proofs with cut we can show that:

$$(\mathsf{GF} A \rhd \mathsf{GF} B) \rhd \mathsf{GF} C \vdash_{\mathcal{L}} \mathsf{GF} A \rhd (\mathsf{GF} B \rhd \mathsf{GF} C)$$
 if and only if 
$$\mathsf{G} ((\mathsf{F} A \trianglerighteq \mathsf{F} B) \trianglerighteq \mathsf{F} C) \vdash_{\mathcal{L}} \mathsf{G} (\mathsf{F} A \trianglerighteq (\mathsf{F} B \trianglerighteq \mathsf{F} C))$$
 if 
$$(\mathsf{F} A \trianglerighteq \mathsf{F} B) \trianglerighteq \mathsf{F} C \vdash_{\mathcal{A}} \mathsf{F} A \trianglerighteq (\mathsf{F} B \trianglerighteq \mathsf{F} C)$$

Similarly, we have the following:

$$\mathsf{GF} A \rhd (\mathsf{GF} B \rhd \mathsf{GF} C) \vdash_{\mathcal{L}} (\mathsf{GF} A \rhd \mathsf{GF} B) \rhd \mathsf{GF} C$$
 if and only if 
$$\mathsf{G} (\mathsf{F} A \trianglerighteq (\mathsf{F} B \trianglerighteq \mathsf{F} C)) \vdash_{\mathcal{L}} \mathsf{G} ((\mathsf{F} A \trianglerighteq \mathsf{F} B) \trianglerighteq \mathsf{F} C)$$
 if 
$$\mathsf{F} A \trianglerighteq (\mathsf{F} B \trianglerighteq \mathsf{F} C) \vdash_{\mathcal{A}} (\mathsf{F} A \trianglerighteq \mathsf{F} B) \trianglerighteq \mathsf{F} C$$

#### 5.2 Cut Elimination

...

## **Appendix**

## A Full Specification of NA Logic

 $\Gamma \vdash_{\mathcal{L}} A$
